INDEX

Problems

» Insecure Platform

There are hundreds of exchanges that went down due to being hacked. KRIPTOSH is built to high standards, audited, and penetration tested. We have experience building financial systems to the highest security standards and strive to ensure security first.

» Poor Market Liquidity

KRIPTOSH's team have been in both the finance and crypto industry for many years. Team has worked on and operated a number of exchanges, and have accumulated a large network of partners in this space. These partners will be key in bootstrapping the exchange.

» Poor technics

Exchange systems need to be engineered from the ground up with security, efficiency, speed, and scalability in mind. This often slows down the initial development, but is critical for long-term success.

» Poor CS

KRIPTOSH is built with service in mind. KRIPTOSH shares support responsibilities across the entire staff and company. When a trader has a problem, they get an answer directly from someone who knows the system and not someone reading from a script.

KRIPTOSH Exchange

We provide all essential services that users need for their trading activities, encompassing both fungible and nonfungible assets. All our services comply with Indonesian regulations, ensuring transparency and security.

Est. APR: 1.24~1.51%

| 30 | 60 | 90 | 120 |

Minimum amount: 1,000 KTC

STAKE NOW

Referrals

Referral system of KRIPTOSH exchange has various advantages. Such advantages are as follow:

Invite friends

When a user joins the exchange through a referral link or code, both the referrer and the referred user may receive rewards.

Commission sharing

When a referred user makes a trade, the referrer earns a percentage of the trading fees that the exchange charges the referred user.

Trading reward

We offer rewards based on the trading volume of the referred users. This means that the referrer earns rewards based on the amount of trading the referred user does.

Level-based reward

Our referral programs use a level-based system. If the referred user invites new users, the referrer can earn rewards from the trades of those new users.

Promotions

We will run promotional events where higher rewards are offered for a limited period.

Referral contest

We will host referral events during specific periods where users who meet certain criteria (like referring a specific number of people or trading a certain volume) can earn additional rewards.

KTC/USDT Trade

For users' convenience, KRIPTOSH will list KTC/USDT pair for easy liquidation of KTC.
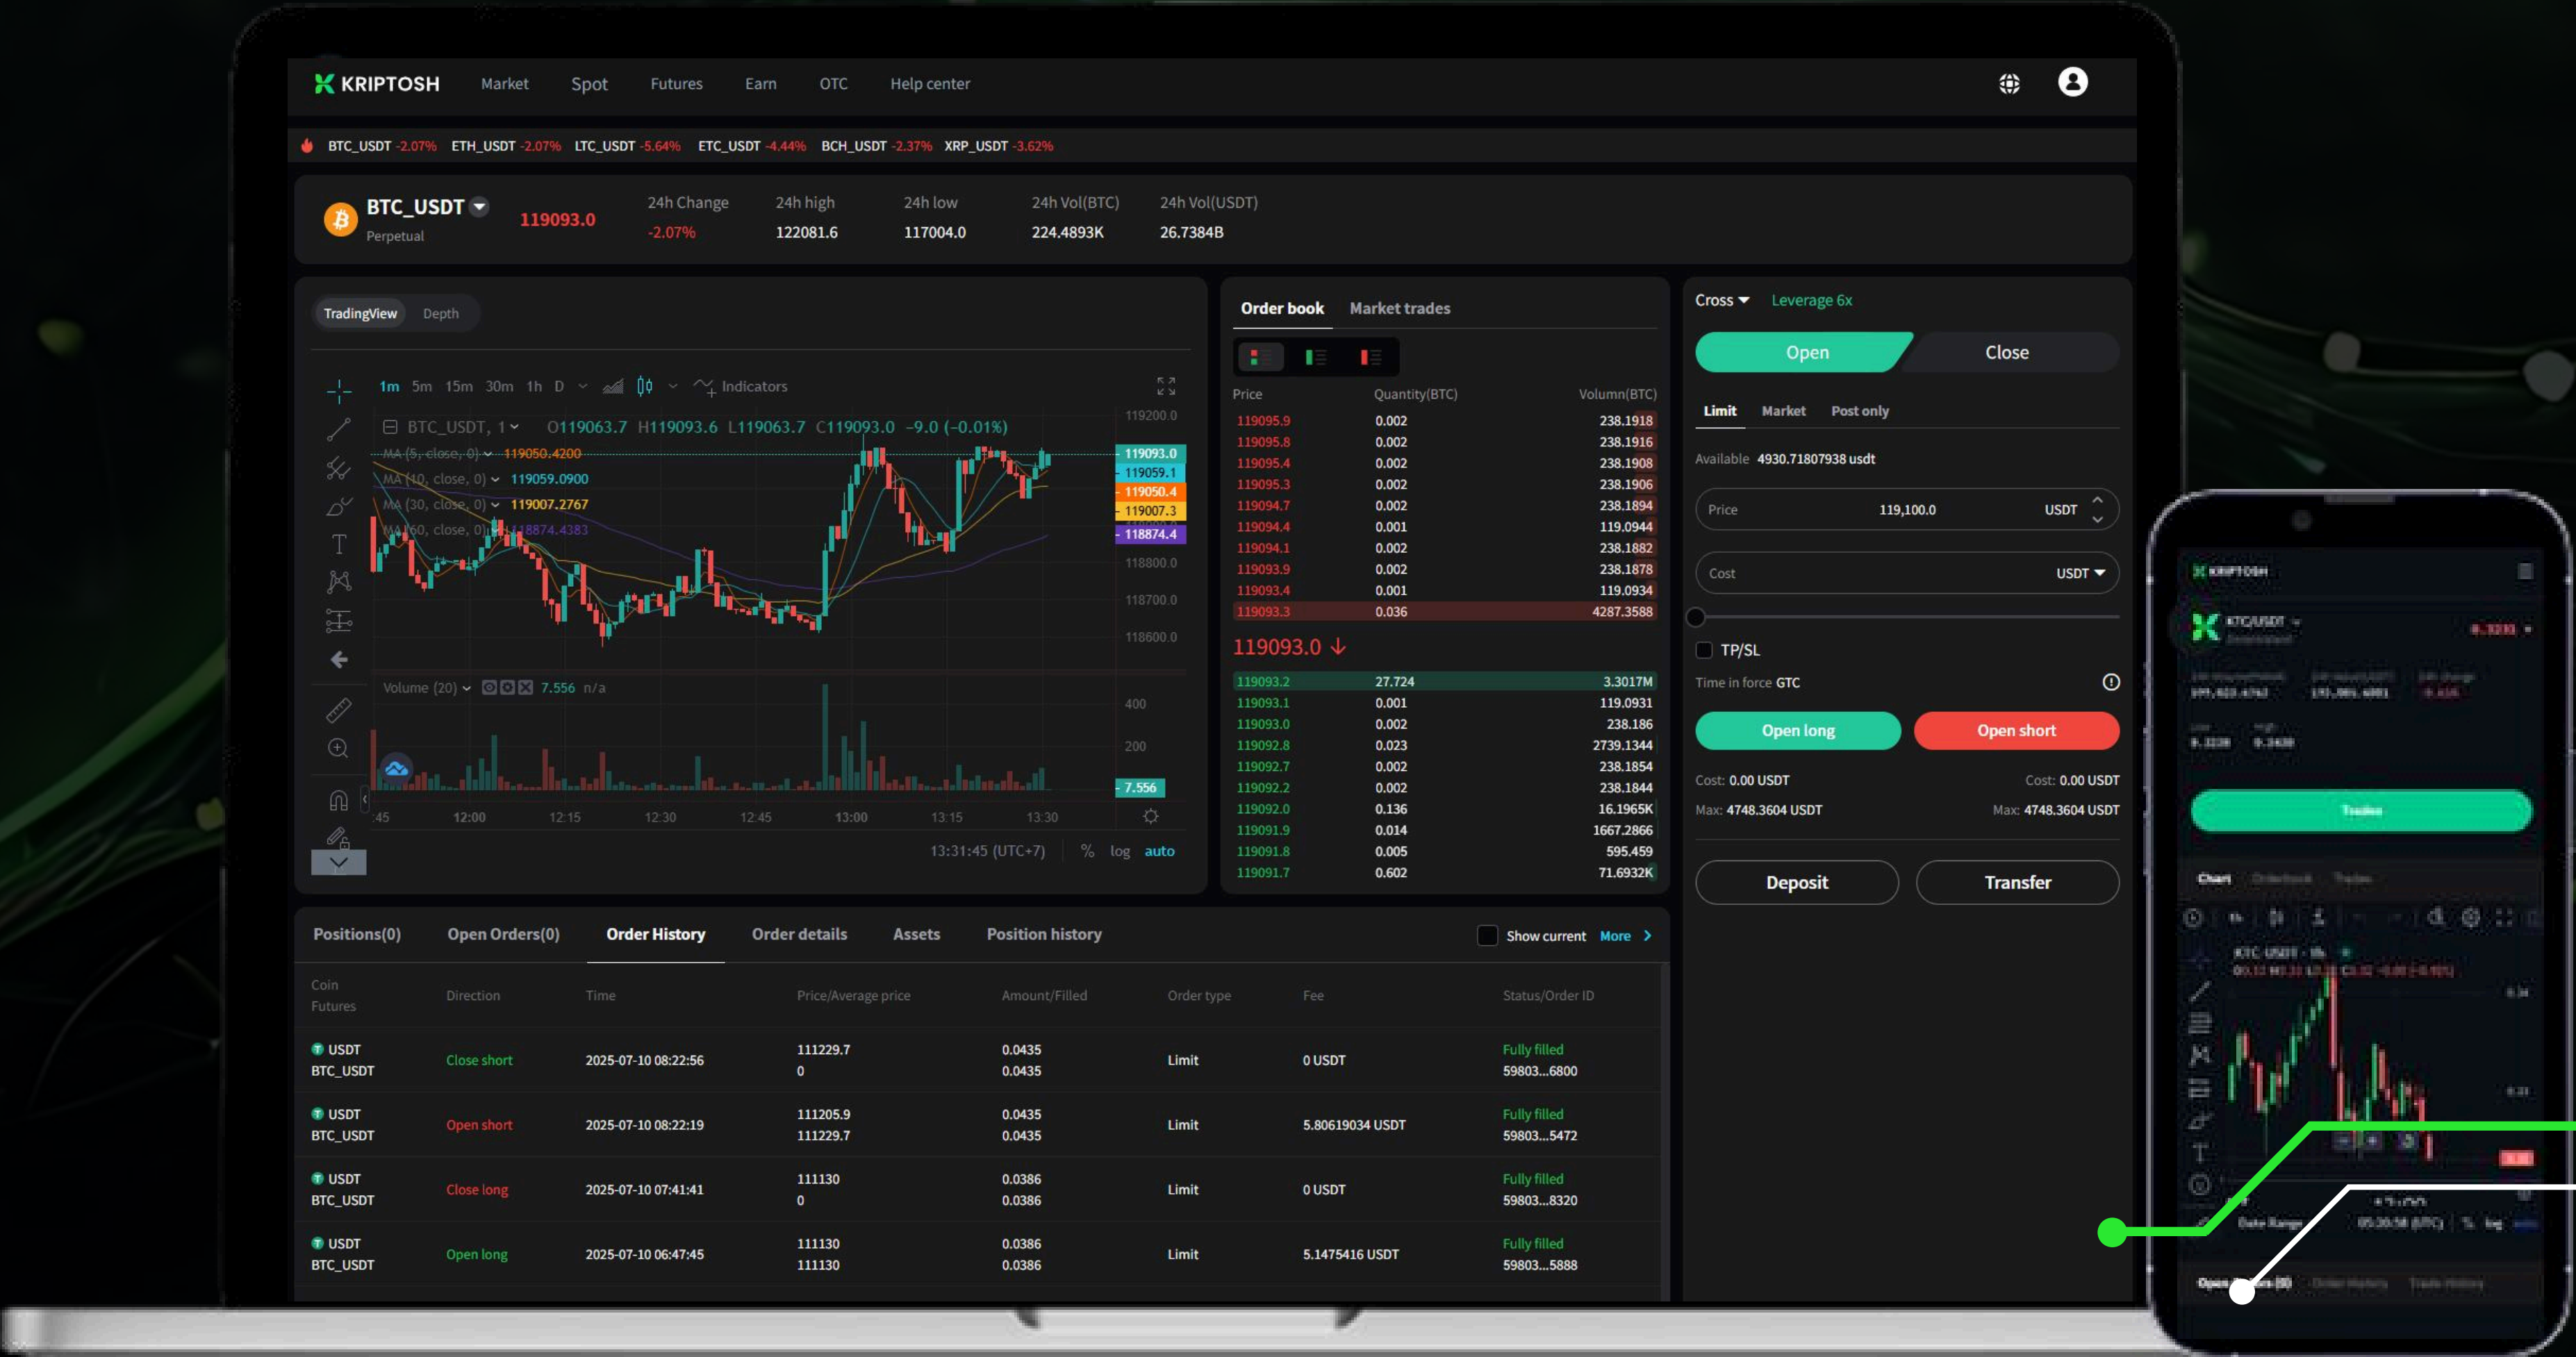

AI Algorithm Trading

Our 3rd party Quant trade team will offer AI based algorithm trading system that is a monthly subscribe model. This highly skilled team provides one-click auto trading by selecting risk types you want to choose.

One-click Process and Flow

① User Input (Ultra-Simple Interface)
The user only needs to select 2 things, and it's done.
1) Select Investment Amount → Minimum of 10 USDT
2) Choose an Investment Strategy → Click one of the 3 risk options

② AI Investment Strategy (AI Automatically Executes Trades)
Based on the user's choice, the AI automatically buys and sells the optimal coins.
1) Safe Strategy → Focuses on stable portfolio with BTC, ETH, USDT
2) Balanced Strategy → Includes BTC, ETH, and large altcoins
3) High-Risk Strategy → Includes undervalued altcoins and short-term trading

③ AI Real-Time Market Analysis (Trading Algorithm)
The AI analyzes real-time market conditions and determines the optimal entry and exit timing.

1) The AI analyzes exchange data to determine the best buy and sell timing.
2) The AI performs sentiment analysis (from news, Twitter, etc.) to consider market psychology.
3) Risk management features are integrated → Automatic stop-loss during market crashes.

**④ Investment Execution & Real-Time Monitoring**
1) After investment, the AI automatically adjusts the portfolio
2) Real-time profit updates → Alerts notify the user
3) Automatic selling when target profit is reached (Take Profit feature)

⑤ AI Protection System (Loss Prevention)
1) Maximum loss limit → Automatic stop when a 10% loss is reached
2) Automatic stop-loss in case of a sudden drop
3) AI recommends "Pause" after detecting volatility

Launchpad

KRIPTOSH launchpad will select and provide only projects that have passed strict standards in various fields, and will strive to ensure that participants have a valuable relationship with the project.
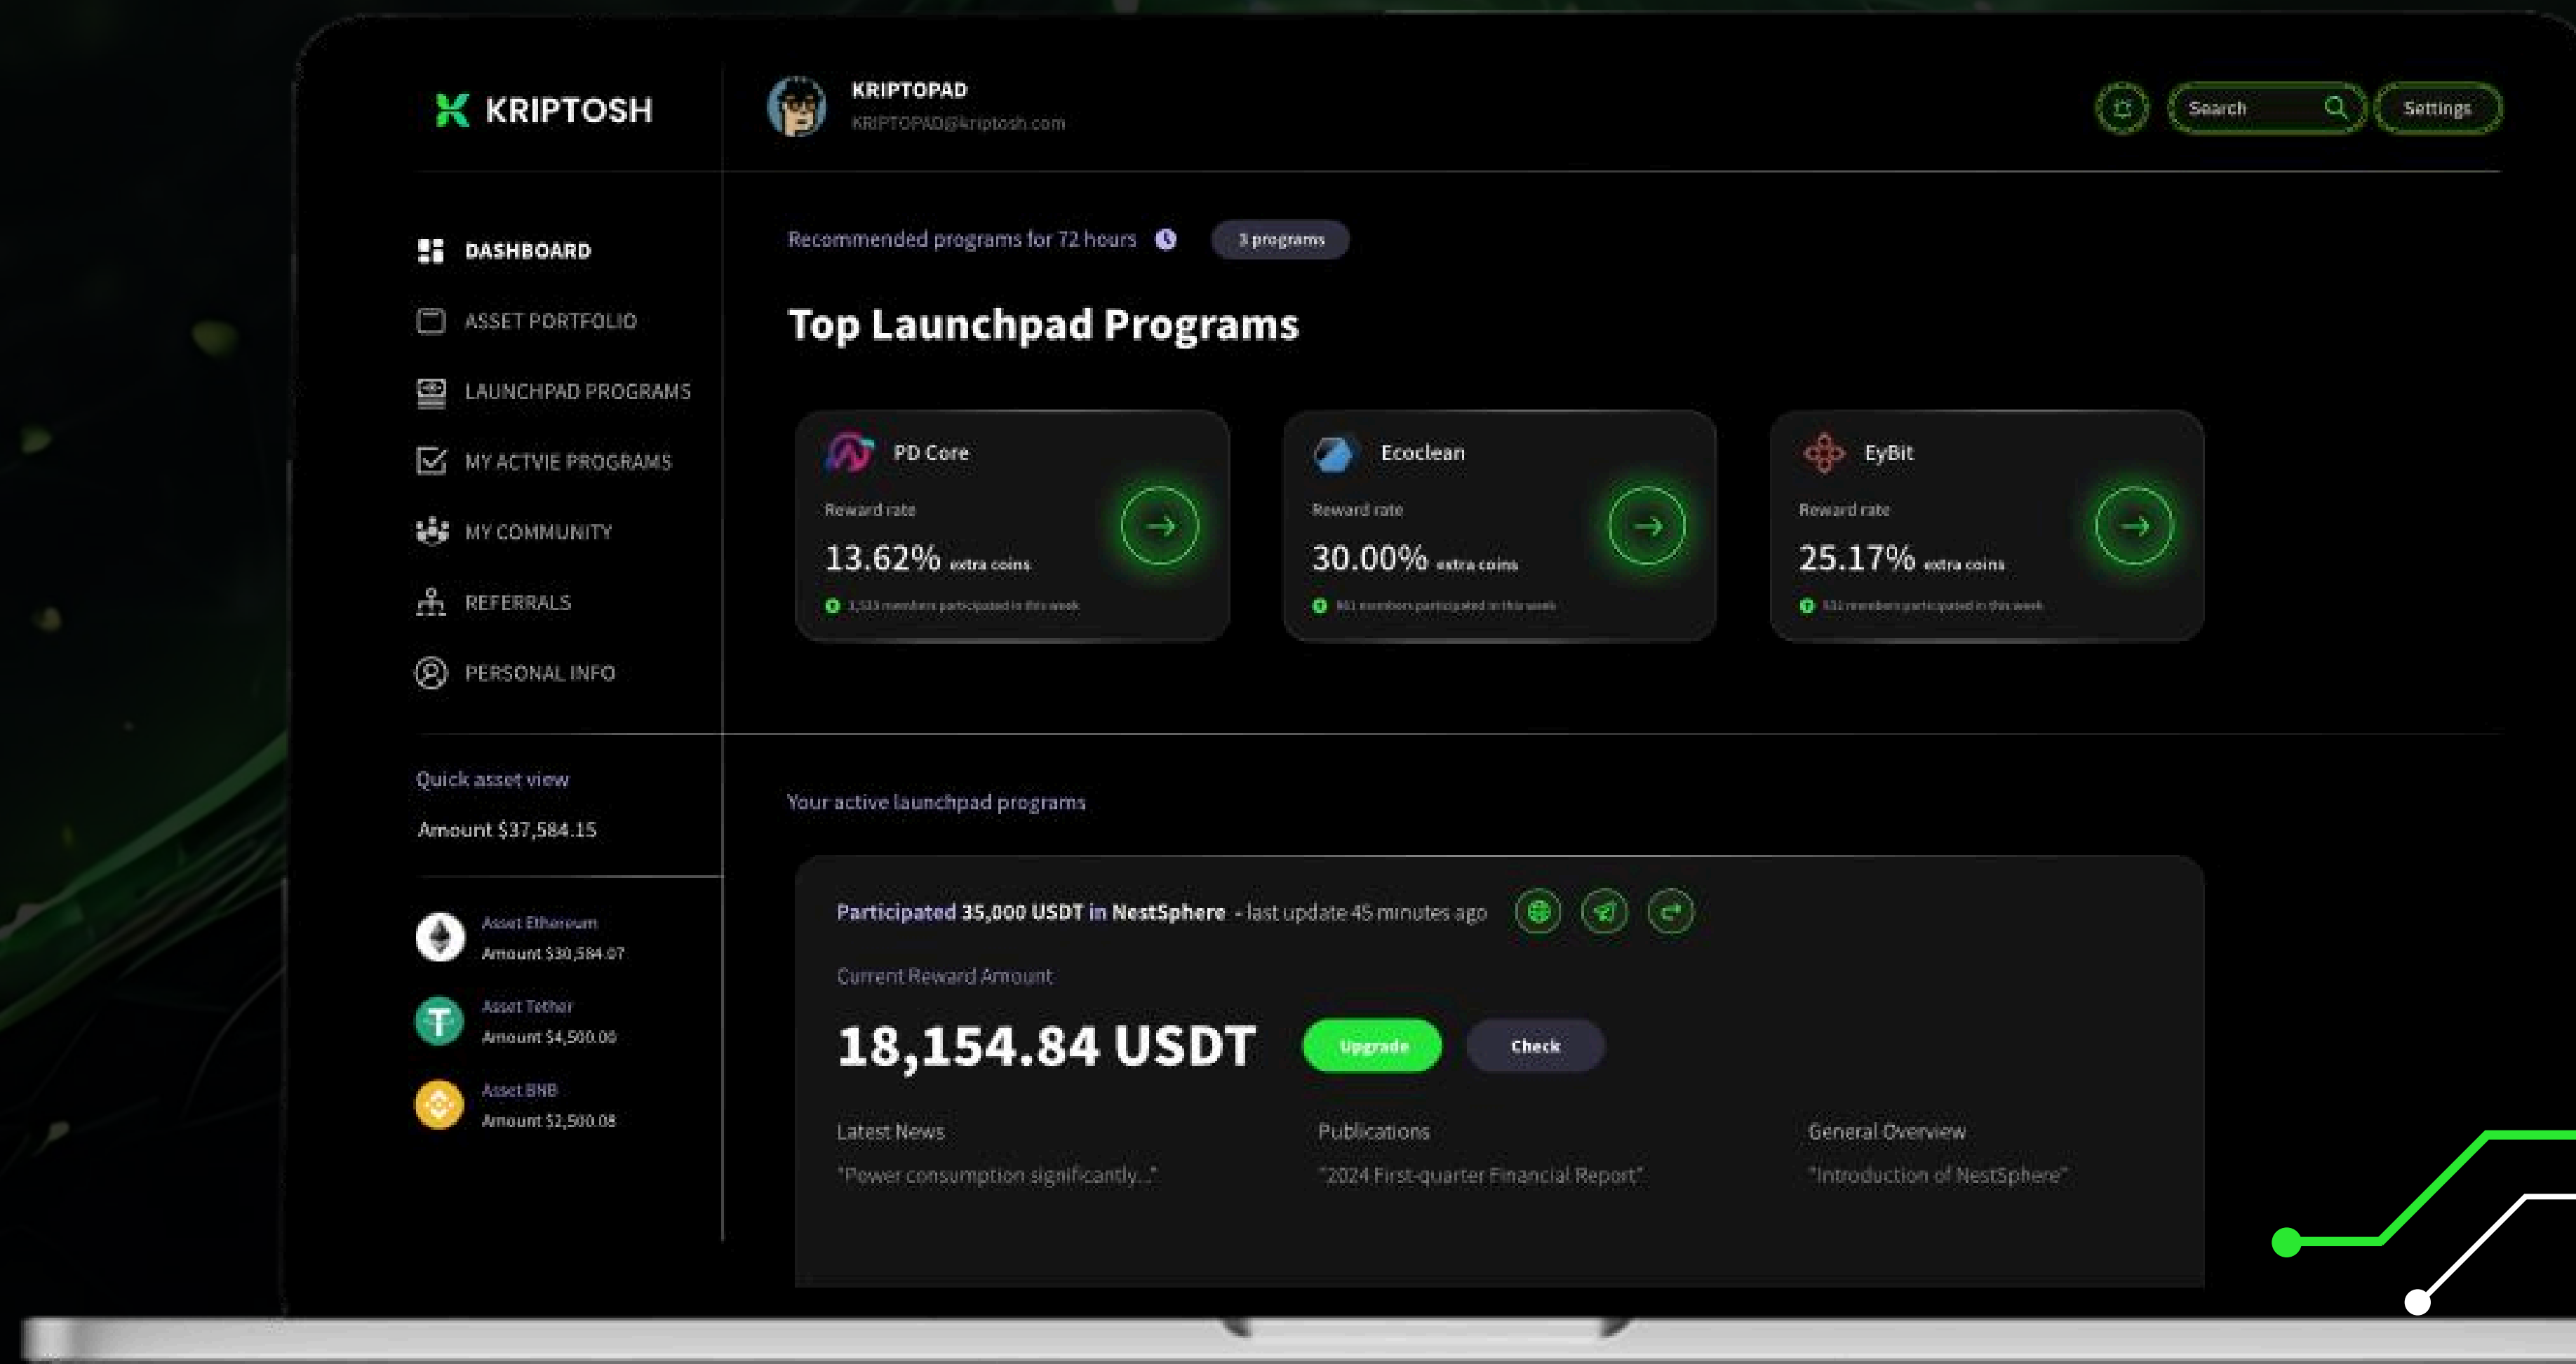

Fee Discount

With our KTC coin, traders will receive transaction fee discount with a maximum of 25%. It will automatically apply by activating this option.
